MONTGOMERY
COMMUNITY
COLLEGE
Spring 2018 Schedule

Take a look through the keyhole.
What do you see?
Possibilities?

If you take a look through the keyhole you might discover something very important waiting for you on the other side of the door. What are you looking for?

Maybe you're looking for the chance to do something meaningful with your life. You see yourself in a job helping people or in one that fulfills a lifelong dream.

Maybe you're looking for opportunities. You have skills but you want to do more. You see yourself moving ahead in your career. Or maybe you never got your high school diploma and you see yourself going back to school. There you are, with your diploma in your hand!

Maybe you've always dreamed of starting your own business, being your own boss. You see yourself using that talent you've always had, and now you're working for yourself!

Then again, you may have done it all and now you want the chance to do something fun. You see yourself meeting new people who share your interests, and you're laughing, and talking, and learning all at the same time.

Maybe you dream of earning a degree and you see yourself with a cap and gown, proudly walking on stage to collect your diploma.

Whatever you may be looking for, take a look through the keyhole and see the possibilities. Then walk through the door and make your dreams come true.

Do you see yourself in a new job? 05

Do you see yourself with new skills? 14

Do you see yourself as your own boss? 20

Do you see yourself having fun? 22

Do you see yourself with a college degree? 32

MIKE DUTTON
EMT-P, AAS

"My name is Mike Dutton and I'm from Aberdeen, N.C. I started out as a **volunteer firefighter** at the tender age of 16. All my family members were volunteer firefighters of the Crestline Volunteer Fire Department, and my grandfather was part of the original board that founded it. You could say **rescue work is in my blood.**

In 1986, I took my first EMT class and in '87, volunteered for the rescue squad in Aberdeen. There was no EMS in Moore County at the time so we were 'it.' I took some rescue classes, too.

About that time a friend told me that Montgomery Tech was getting a paramedic program. I took it and graduated in 1989.

EMS was in its infancy in Moore county. I was working for them full-time by then and was their **first paramedic.** We ended up training everyone else. I stayed there 25 years when the position came open in Montgomery County for an EMS Director. I definitely wanted to be director here. I have many family members here and coming here is coming home."

Mike always wanted to do rescue work. As he said, it was "in his blood." Rescue work can be **exciting and life-changing,** and it's not limited to riding in the back of an ambulance.

Hospital systems utilize EMTs for critical care transport and emergency rooms. Most career fire departments require firefighters to be EMTs. EMTs work in doctor's offices, blood/plasma clinics, industrial settings, and outdoor rescue occupations like ski patrol.

Basic EMT is coming back to MCC this spring. Do you see yourself in a fast-paced, life-changing career? Look no further. The door is open to your possibilities. Come on in!

Do you see yourself in a fast-paced, life-changing career?

Our Medical Technician Initial or EMT Basic course is designed to train you to become emergency medical personnel.

In this course, you will be exposed to emergency patient care through both classroom training and hands-on application in patient assessment, basic life support techniques (including airway management and CPR), oxygen therapy, treatment of shock, treatment of fractures, management of various medical emergencies and emergency childbirth. Once you successfully complete this course, you will be eligible to take the North Carolina and/or National Registry Basic Emergency Medical Technician certification exam. *Note: Textbooks and other supplies will be required for this course and are a separate cost.*

For more information call 910-898-9672.

Are you looking for a job-training program that can get you in the workforce quickly? Do you need a prerequisite to enter an LPN or RN program?

The **NURSING ASSISTANT** program is a 174-hour program for people who are interested in being part of the healthcare industry. If you apply now, you could be ready for work in less than 6 months!

Most nursing programs require individuals to have a nursing assistant credential as part of their prerequisites. If you're on a waiting list to enter a nursing program, you can complete this course in less than 6 months.

HOW DO I BECOME A NURSING ASSISTANT?

Nursing assistants must complete a state-approved education program and pass a competency exam to become certified. Montgomery Community College's NA programs are state-approved. Applicants to this program are required to have a high school diploma or equivalent, or must pass a reading test provided at the college. For more information, contact Donna Harwood at 910-898-9706.

Do you see yourself in a medical office?

The Medical Office Administration program prepares you for employment in the areas of medical office administration, medical billing and coding, dental office, patient services, and medical documents.

You'll learn:
Medical terminology
Computer applications
Medical office management
Medical coding, insurance & billing
Medical legal and ethical issues and more!

Successful graduates qualify for employment in a variety of healthcare settings such as medical and dental offices, hospitals, insurance companies, laboratories, medical supply companies and other healthcare-related organizations.

You Can Earn Your Associate Degree

You can earn an Associate in Applied Science Degree or Diploma in Medical Office Administration, or choose between a Medical Office Administration Basics or a Medical Billing and Coding Certificate.

JESSICA MORALES

APPRENTICE

"My name is Jessica Morales and I'm a senior at East Montgomery High School. I got involved in the **apprenticeship program** this summer. More than anything, I wanted to get a new experience. I was doing well academically, but didn't have a lot of experience with the job opportunities that are in Montgomery County.

I want to get into **engineering.** (Some people) thought I wouldn't be a good fit for the program, maybe because I'm a female. I haven't taken any technical classes - not that I didn't want to. I was taking honors classes. But I wanted to learn important skills.

I would like to get a bachelor's degree but I think it's harder to go out and work in the real world (straight from the classroom) without doing the work first. The apprenticeship program allows you to study so many things.

At first, I experienced a lot of frustration in my welding class. I was completely lost and I thought about backing out. But I want to finish to prove that anyone can do it. I've had a lot of help from my teacher who is very supportive, and now I have a better idea of what it's about. I look at the art of it. It's amazing if you can do that.

Right now I'm taking a psychology class online, welding, and four high school classes. The rest of the days I go to my job with American Axle. I work with a **quality engineer.** When you start with the apprenticeship program they put you in a position in a job you want to learn. I have my own time on Thursdays and weekends. I study a lot. I like to study. Some of the apprentices like to work and they work a lot, but I think you can burn out so I take my time.

My advice to other females who are thinking about the apprenticeship program would be to start with whatever you want to focus on. There are a lot of men, but you can get over that and focus on what you want to do and don't be afraid. No one can tell you, "You're a woman, you can't do this." Remember, if you're in the program, you're special.

Later you can say you had that experience and you will have **courage and self-confidence.** You can say, "I did that." You won't ever be intimidated. More girls should have that experience and have a new kind of job, not just in an office. There's so much talk about gender equality. Did you know that women make up only two percent of the welders in the country? Why not do something that will make a difference?

My goal is to get a bachelor's degree in architectural engineering. There are a lot of great performers in my school academically. Education is really important. My advice is **don't quit.** If you don't get into the school you want, you can go somewhere else. Just don't quit. Read and learn. If you excel, one day you could be someone's boss or in a top position in a company."

APPRENTICESHIP MONTGOMERY

What is Apprenticeship Montgomery?

Apprenticeship Montgomery is a program that gives you an opportunity to gain work experience (Earn Money!) while obtaining your college degree (Free Education!).

Apprenticeship Montgomery is looking for a few good candidates to become **Industrial Maintenance Technicians.** If you are mechanically inclined and you would like to secure your future, this is the program for you.

Apprentices will work for one of the following companies as they complete the requirements of the apprenticeship program.

1. Jordan Lumber
2. PaperWorks
3. American Axle and Manufacturing
4. KM Machine
5. Unilin/Mohawk Industries
6. McRae Industries

Who can apply to be in the program?

1. High school students 16 years or older
2. Montgomery Community College students who are enrolled in a technical program
3. Military Veterans
4. Members of the North Carolina National Guard
5. Adults looking to start a career in advanced manufacturing

How to apply?

Applications to participate in Apprenticeship Montgomery will be available on February 2nd. Applications can be picked up at your local high school or the Workforce Development Center at MCC. Applications are due April 30th. Applications may be turned in to the following locations:

1. High school students: Turn application in to your high school guidance counselor.
2. All other applicants: Turn application in to the Workforce Development Center at MCC.

If you would like to get a head-start in the program, you may register for the Certified Production Technician class. Successful completion of the class guarantees you an interview with the companies listed above.

Certified Production Technician

1/9-2/21 | TW | 8:30 AM-5 PM | $180

RUSSELL INGRAM

"Hello. My name is Russell Ingram and I am the new NC Works Career Development Consultant. I'm originally from Richmond County but spent several years working with youth programs in Montgomery and Randolph counties.

The NC Works Career Center is located on Montgomery Community College's campus and is now operated by MCC through a grant. You might remember the Employment Security Commission. Those services are now provided through NC Works Career Centers across the state. The NC Works Career Center is here to provide employment and training assistance to everyone who walks through its doors. So what does that mean?

First, we help you register with NC Works online, the state employment website. Then, we assess your needs and get you in touch with agencies that can meet those needs like the Department of Social Services, Vocational Rehabilitation, or Housing Authority. Our ultimate goal however, is to help you find employment.

In the meantime, we help you determine the right job for you through a career assessment. We help you build a resume, do a job search, or even get the education or training you need to get the job you want. If you stick with the program, we can even pay for your education up to and including an associate degree.

Anyone who has been laid off from a job is eligible for the Dislocated Worker program. The Adult program helps individuals with low incomes but is not restricted only to low income workers. Each case is considered individually.

My advice is, don't let your fears dictate your life. Just because you've never done something before is no reason you can't.

My name is Russell Ingram, and I am here to assist you in whatever capacity I can. I'm looking forward to helping you."

Do you see yourself with new skills for a better job?

Can you answer "yes" to any of the following questions?

Are you enrolled in community college?

Would you like to be?

Are you asking yourself how you are going to pay for college?

Are you looking for a job?

Do high gasoline prices have you in a bind?

Do you need money for school supplies?

If you answered "yes" to any one of the above questions, let us see what the NC Works Career Center can do for you. We have trained staff that can assist you with:

√ Job search
√ Career assessment
√ Financial aid assistance
√ Transportation
√ Workshops
√ Keytrain/Workkeys
√ Telephone/fax services
√ Labor market information
√ Referrals
√ Videos, CDs and more!

Job training empowers people to realize their dreams and improve their lives.

MELISSA WHITLEY

Many students who come through the Adult High School Equivalency program do it to fulfill a lifelong goal, or to be examples for their children, or as in Melissa Whitley's case, to get a better job. Many students **overcome tremendous obstacles** to reach that goal. This is Melissa's story of ongoing faith and beating the odds that threatened to make her an invalid for life.

"My name is Melissa Whitley. I am a GED® graduate and a student in the Medical Office Administration program. My story is not about me, it's about what Jesus has done for me.

I had no intention of going back to school, but I had a stroke. I had so many skills that would have given me a job. I was in the medical field for 30 years . . .

I am from New Haven, Connecticut, but the Spirit (of God) led to me Norfolk, Virginia. where I lived for ten years. I had a job that I loved. I was a CNA, a physical therapist assistant and I did mentoring, training others for their jobs.

One day in December 2013, I felt very tired. I laid down on the couch and took a nap. When I woke up, I got up and started walking and fell down on the floor. My roommate came home and I told her I needed her to take me to the hospital. **They told me I had a stroke.** I stayed in rehab until Christmas. Then they sent therapists out to the house to work with me. **So that's when the struggle began.**

I had to learn how to walk, how to talk, I had to learn how to wash myself, how to eat with my left hand, how to write with my left hand. I did home therapy for a month, then they had me do outpatient therapy where I had to go back and forth to my appointments. I had to get a service to pick me up and drop me off. I had to live with people, I had to ask people to take me to the grocery store and the bank and the doctor. I cried many nights. I had to learn that God put people in my life that He had ordained for my future.

I had to move back to my mother's house in Candor. I moved out when I was 16 and hadn't been back since.

I stayed there for about a year and a half and while I was there I was seeking God because **everything I tried to do, I couldn't do.** When I gave it to Him He said, 'You're worried and aggravated about it, but I don't give that.' Even when you struggle with Him, He gives you peace. If you believe Jesus died for your sins, 'You can do all things through Him.'

My mother had also had a stroke and she said there were people who could teach me to drive. She told me about Vocational Rehab so I went and told them I wanted to learn to drive so I could get a job. **It turns out God had a whole different plan.**

She (the Voc. Rehab rep.) told me about organizations and programs that would help me get a job. It took a year, but I learned how to drive. They helped me do my resume and suggested I go back to school to get my high school diploma. The Spirit led me to go and find out about classes and I enrolled in GED®.

If I had not had a stroke, I could have gone through the tests in six months or less. Because I had a stroke, the neurons don't fire like they're supposed to. It takes me a long time to get what people are saying and they get frustratrated with me.

I'm not going to tell anyone it wasn't a struggle, but **our struggles have purpose,** and God put people there to encourage me. I got to school at 8 AM and didn't leave until 1 PM. I got a tutor. I stayed and studied. That test I took, I couldn't do it. I cried. I couldn't read and do the test at the same time. When I found out I got a 97, I fell on my knees, which wasn't an easy thing to do, and gave God the praise.

I've heard people say that most people with strokes are in nursing homes or have people taking care of them. How could I sit at home and wait for someone to take care of me when God had so much for me to do?

Now I have a high school diploma, I drive myself to school and God has given me an apartment. I'm still in school to be a medical office administrator. I only take one class at a time. It took me a year to get that diploma. It's going to take more than two years to get the associate's degree, but I'm going to get it. There is no doubt in my mind.

God put people there to encourage me. He said I was going to school to get more than a job. I was going to tell people that they need to go to school and 'seek me first and all these things will be added unto them.'

My story is that God came into my life and He has not let me down. So **if you're thinking that you can't do it, 'nothing is impossible with God.'** I want people to come to school to get what God has for them."

MONTGOMERY COMMUNITY COLLEGE

N.C. PUBLIC SAFETY DRONE ACADEMY

Do you see yourself as a UAV pilot?

Time and accountability are vital on emergency scenes. First responders have seconds to make calls that will undoubtedly decide the outcomes to every scenario they face. With the use of drones, first responders and other emergency service crews are now equipped with a powerful tool that can provide real time information that can only be acquired from the sky. Crews now have the needed information to evaluate working fire scenes, search and rescue, manhunts/tracking, police scenes/operations, emergency management scenarios, along with other potential risk- and factor-based scenarios.

The NC Public Safety Drone Academy prepares emergency service members and/or first responders to become effective and well-educated UAV (unmanned aerial vehicle or drone) pilots. The

academy focuses on the laws and regulations of UAVs while offering an extensive hands-on flight school that will expose pilots to:

- Simulation Flight Time: Grasp drone mechanics and basic operation through simulation, to build and prepare you for real flight.

- Real World Flight Time: After learning the basics, you will spend the majority of class completing real flight-time objectives and training.

- Live, Scenario-based Flight Objectives: Objectives are focused on fire, rescue, police, and emergency management situations.

Learn from our knowledgeable staff/pilots and guest instructors. The NC Public Safety Drone Academy is fee-waived for all qualified emergency service personnel and first responders.

@ NC Public Safety Drone Academy

1/9-5/19 | T | 6-9 PM | $181.60 (Fee waived for emergency services and first responders.)

LEARN UAV FLIGHT RULES & REGULATIONS

PART 107 TEST PREP COURSE

This course prepares you for small unmanned aircraft systems (sUAS) flight certification. Topics include flight theory, operations, and training utilizing the Federal Aviation Administration (FAA) Remote Pilot - Small Unmanned Aircraft Systems Study Guide, the North Carolina Unmanned Aircraft Systems Operator Permit Knowledge Test Study Guide, and the North Carolina Department of Transportation (NCDOT) Division of Aviation UAS flight standards & best practices.

The course introduces you to commercial, government, and recreational drone applications and will highlight topics such as regulations, weather, airspace, human factors and sUAS performance.

Upon successful completion, you will be prepared to sit for the FAA Part 107 Remote Pilot Knowledge Test and NCDOT UAS Operator Permit. This course is taught utilizing the NC Department of Transportation Division of Aviation approved curriculum.

DANA DAWSON

BUSINESS OWNER

"My name is Dana Dawson. My husband Ray and I are the proud owners of Uwharrie Mercantile on Main Street in Troy.

I grew up in Summerfield, N.C. but my father (Daniel Greene) and grandparents are from Montgomery County. I spent summers visiting my grandparents and remember the old Hotel Troy. I loved the old building and remember the drugstore that used to be on the corner. I think it was then that the seeds were planted for our future here in Montgomery County.

My husband and I redid the old homeplace in the Lovejoy community and moved here in 2010. For 25 years I was in retail. I worked my way up the ladder to become a vice president. Then I did marketing solutions and loyalty programs with retailers. The last three years I spent consulting for retail operations. I traveled constantly and finally decided to retire from Corporate America. I wanted to stay home but I needed a project.

My husband was in Special Ops in the Army and is now a wilderness guide for Outreach America, which is a non-profit youth ministry based out of Greensboro. The draw of the Uwharries really works with what he does.

We decided to purchase the property that was the Hotel Troy, all four stories and 26,400 square feet of it - everything but the Dog Parlor. Next, we tried to decide what to do with it. That's when the Small Business Center came into it. We met with the town of Troy to find out what the needs were, but we also wanted to respect the heritage of the old hotel. The businesses that went into it needed to fit that heritage.

We came up with four pillars - four things we wanted to accomplish for the space: a place to gather, a place to create, a place to celebrate, and a place to live.

Families need a place to gather and hang out. Artists in the community need a place to have classes and create their art. People need a place where they can

have their parties and celebrations. And Troy needs more places for people to live.

We decided people like to gather around coffee, so the first thing we'd do is a coffee shop. The Small Business Center (SBC) was doing a seminar, "How to Start a Coffee Shop," so I reached out to Jessica (McDaniel, SBC Director) and went to the class. The things I walked away with: it allowed me to understand the business model, the percentage of revenue that can be obtained from selling coffee, and other profit centers to generate revenue beyond coffee. I also got a list of vendors who I was able to tap into for my shop.

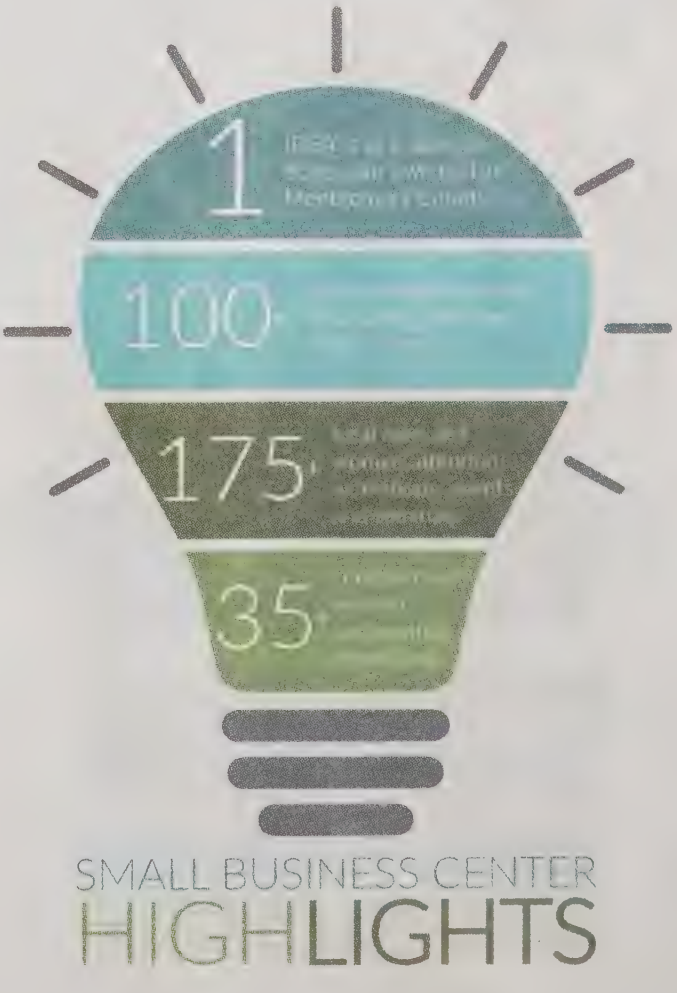
We already had a business plan and we used our own capital, but where the SBC was a big benefit was in knowing the grander scale of the project. The SBC partnership was critical as we began to think about a strategic plan for the next phase.

Seven weeks into it we had a successful coffee shop. We built up such hype on social media and at Troyfest before opening our doors, we went to (SBC-sponsored) Business Brainstorming sessions at Front Porch Pickin'. Riley Beaman (the session moderator) is a great social media advocate. We knew we had to get into this. We had a 7-day build-up on Instagram to our grand opening. The SBC connected the dots and added to what I brought to the table.

Our plans for the downstairs area are for a co-working space for people who are in business who don't have office or meeting space. We want to have artist's space for people who make things to have access to equipment they need and to hold classes and workshops.

The second and third floors, the celebrate and live spaces, are in the design stage which is almost complete. Through a partnership with UNCG, 18 interior/architectural design students have taken this on as their senior project. (Continued next page.)

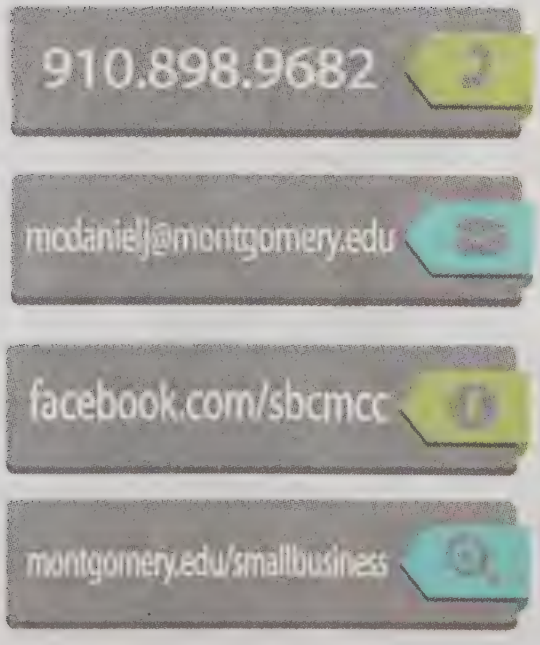
(Dana Dawson continued) Half of the second floor will be a special events space and the other half will be seven hotel rooms. The third floor will be apartments.



Throughout this process, the Small Business Center has been a valuable resource to help us continue to move through the different phases to make our vision a reality.

We've already done things I didn't envision but we're satisfying needs in the community. We've hosted the Troy Women's Club, the National Turkey Federation, a baby shower, and people are already booking their Christmas parties. We've also served as a conduit for other businesses. All our bakers have their own kitchens, but they're selling here too. We partner with local caterers. Artists sell their wares. The connections we've made with other businesses give them the opportunity to showcase what they do and help us all be more successful."

For more information about what the Small Business Center can do for you or your business, contact Jessica McDaniel, Small Business Center Director at:



Do you see yourself as your own boss?

The Small Business Center offers free small business assistance. For complete information about all our services, or for additional seminars, please visit our website at www.montgomery.edu/small business.

MEREDITH HEYWOOD

POTTER

"My name is Meredith Heywood. My husband Mark and I own Whynot Pottery and I teach pottery at MCC. We moved to the family farm in the Seagrove area in 1976. We raised goats, rabbits and children. My husband worked in the furniture industry.

Around 1978 or 79 we met a couple working at Jugtown who **encouraged us to learn** how to make pots. Dorothy Auman of Seagrove Pottery recommended MCC. Mark and I decided to try a night class to make sure we could learn how to do it. I knew a lot of potters who learned from their families at a young age. We knew it was a learned skill and that we'd have to take our time.

Once we were completely into the program, I took day classes with Mike Ferree while Mark continued working and took night classes. I brought the kids to the daycare on campus. We thought this could be a **full-time business** for us.

The best thing about the classes was the knowledge and skill I gained from the classroom - not just from the instructor, but from other students as well. Some students were more advanced and shared their skills. The **connections** I made with the students **were invaluable**, and many of them were going to school for the same reason I was.

Among my classmates were Mack Chriscoe (Chriscoe's Pottery), Millie McCanless (Dover Pottery), Fred Beane (Old House Pottery), David Garner (Turn and Burn Pottery), Brad Tucker (Cedar Creek Gallery), and so many more came out of MCC's pottery program.

Three of us opened potteries in 1982 to make a total of 12 shops in Seagrove. We've spent the last 35 years selling pots from Whynot Pottery.

The newer potters were bringing a different skill set from the family potteries where they passed down skills from one family member to another. Each one would have a different job. One would mix the clay bodies, another would turn the ware, and another would do the glazing, loading and firing. At MCC, we were learning to do all the different skills ourselves.

We were referred to as studio potters. Our plan was to learn how to reproduce our work over and over again. Production pottery allows you to learn the skills to create things like matching sets of tableware.

Mike Ferree also brought in a sense of design. I had never picked up a paintbrush in my life and he pushed us to explore design, not just function. We also took business classes. We found out that learning about the business end is as valid and imporatnt as learning how to make art.

After Mike retired, I was aksed to finish teaching out his degree students. I knew I had the skills but I had never taught before. It took a lot of discussion for me to step out of a studio and into the classroom.

What I found was that I enjoy teaching and sharing skills I've amassed over the last 35 years. I discovered that **I wasn't just teaching them, they were teaching me.** I discovered new perspectives on what I was doing, and if there was a question I couldn't answer, I had to explore avenues I had never explored. It took my work to a new level.

To anyone who might want to learn pottery I would say that **pottery is a skill.** We talk about art, but learning to throw **takes time and patience.** All the while you're building a set of skills. It's not a fast process. In 16 weeks we teach you how to center clay and pull it up into a shape. The great thing about it is the school provides the materials and recyles everything. You mix your own clay and use it over and over. You make something, you throw it back and start again.

MCC's pottery program put out a massive number of working potters in North Carolina. It's a great place to learn throwing skills and to see if it's something you want to do."

Do you see yourself having fun with clay?

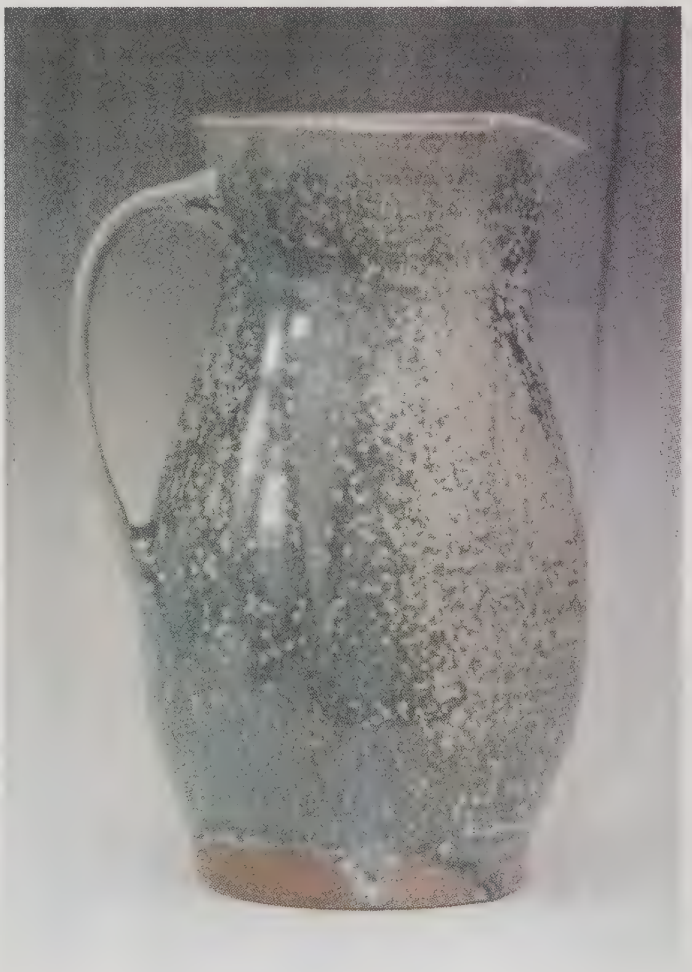
@ Advanced Studio Pottery
1/22-5/7 | M | 6-9 PM | $127
Designed for the advanced student to explore new techniques in making and firing pottery and sculpture. At least 2 classes in pottery from MCC required for enrollment.

@ Advanced Studio Pottery
1/23-5/4 | TTHF | 8:30-4:30 PM | $182
Advanced students will be guided with a balance of formal demonstrations and self-directed projects. Includes studio access on Wednesday afternoons. Experience necessary.

@ Beginner Clay Class
3/6-5/1 | T | 6-9 PM | $72
Explore handbuilding and wheel-thrown pottery techniques. No experience necessary!

Pottery Workshops

@ Plaster Uses in the Studio with Josh Manning
2/3-2/4 | SASU | 9 AM-5 PM | $100
Who's afraid of plaster in the studio? Not us! Learn to make throwing bats, table tops and simple press molds in this hands-on workshop. Josh brings a wealth of studio and industrial experience to the workshop lending his knowledge to participants who want to use plaster in the studio but don't know where to start. Price includes materials and lunch on Saturday.



@ Salt Glaze 4-Day Workshop with Josh Floyd
2/24 | SA | 9 AM-2 PM | $127
4/20-21 | FS | 8 AM-5 PM
4/24 | T | 5-9 PM |
Here is your chance to explore the historic foundations of salt glazing and the technical side of claybodies, slips and glazes. Meet for demos and discussions in February, then come back to load and fire our salt glaze kiln on April 20-21. Unload and discuss the results on April 24.

@ Mark Arnold: Hands-on and Hand-Built
4/7-8 | SASU | 9 AM-5PM | $225
Watch, listen, and make alongside Mark Arnold as you explore pressmolds, earthenware slips and glazes. Discover new ways of making your own work through the thoughtful eyes of this up-and-coming artist. Price includes materials and lunch on Saturday.

Do you see yourself 'forging' skills on the 'cutting edge' of a new hobby?

Knifemaking Weekend Warrior Workshops

@ Basic Forging with Bill Wiggins
1/18-21 | TH | 9 AM-6 PM | $375
| FSASU | 8 AM-6 PM
This hands-on class explores proper forging, heat treating and finishing of knife blades. Learn the basics of steel selection, forges and forging tools, heat treating and finishing of forged blades.

@ Mokume Gane with Phillip and Barry Jones
2/2-4 | F | 9 AM-6 PM | $375
| SASU | 8 AM-6 PM
Students will learn the ancient technique of mokume gane, the fusing together of layers of copper, silver and nickel to create a billet of decorative mokume for use in jewelry, knife guards and bolsters. Learn proper cleaning, fusing and forge welding techniques as well as patterning and design.

@ Tomahawk Forging with John Hege
2/16 | F | 9 AM-6 PM | $375
2/17-18 | SASU | 8 AM-6 PM
Forging a tomahawk is a great starter project for blacksmithing. Forging the tomahawk head will introduce you to the basic practice of drawing and shaping steel as well as forge welding and heat treating to harden the edge. You will forge a traditional style "wrap around" tomahawk head and will shape and fit the handle from provided hardwood blanks. Personalize and complete the "hawk" with traditional details and embellishments of your choosing.

@ Advanced Blade Forging- Integral Fighter Knife with Theo Nazz
3/8 | TH | 9 AM-6 PM | $375
3/9-11 | FSASU | 8 AM-6 PM
Join *Forged in Fire* Champion Theo Nazz in this integral Bowie fighter knife making class. Design and plan your blade and guard, then, with hammer and fire, bring your idea to life. Leave the class with a forged, rough-ground and heat-treated knife with hamon. An excellent chance to work one-on-one with Theo! Some forging experience is required.

@ Grinding 101 with Ed and Tanya Vanhoy
3/23 | F | 9 AM-6 PM | $375
3/24-25 | SASU | 8 AM-5 PM
This class is designed to teach the proper techniques of free hand grinding, covering hollow, flat, Scandinavian, and tactical grinds. It is open to all levels of experience. All students will finish a fixed blade of the course's design. Materials will be provided.

@ Blacksmithing Historic Gate Hinges with Greg Bray

Forged in Fire's youngest champion, Liam Hoffman from Avery County. demonstrates the use of hammer and anvil during nis class at MCC recently.

4/13 | F | 9 AM-6 PM | $375
4/14-15 | SASU | 8 AM-6 PM

This exciting NEW class will focus on 18th century design and take the student through different aspects of hinge development. Students will make a pair of German-style strap hinges, a pair of Moravian Staghorn hinges and if time allows, a small set of cabinet hinges. Class will also cover different tooling, tongs and file work. This is an excellent class for intermediate blacksmiths, forging history with practical blacksmithing skills. Some tools and experience are necessary.

@ Fixed Blade Knife and Sheath 102
4/19 | TH | 9 AM-6 PM | $375
4/20-22 | FSASU | 8 AM-6 PM
Class will cover all phases of fixed blade knife construction. Students will finish one knife and sheath of their design approved by instructor with level of experience. Grinding 101 recommended prerequisite, but open to all experience levels.

@ Blacksmithing and Forging 101
5/10 | TH | 9 AM-6 PM | $375
5/11-13 | FSASU | 8 AM-6 PM
Explore all points of forging with Ed Vanhoy. Class will include instruction in anvil orientation, types and uses of forges, forging tools and techniques. Students will learn forging processes and will finish basic projects. All materials will be provided.

Knifemaking
Recurring Weekly Classes

@ Intro to Knife Forging with Bill Bisher
1/9-2/27 | T | 5:30-9:30 PM | $175
This class will introduce you to all aspects of forging basic knives and blades. Learn some basic blacksmithing principals as well as metal choice and tool making. Bill is a local knife maker with over 20 years of experience. The class is open to all levels of experience, and is great for beginners.

@ Basic Bladesmithing with Phillip and Barry Jones
1/22-2/26 | M | 5:30-9:30 PM | $120
This class will give you the chance to sharpen your skills in knifemaking. Working side-by-side with seasoned bladesmiths Phillip and Barry Jones, create your vision in this open shop forum. You will walk through every step of the process,from grinding to forging to heat treating. Explore handle design and decorative processes, too. This class is open to all levels of experience.

@ Monday Nights with Ed and Tanya Vanhoy
3/5-5/28 | M | 5:30-9:30 PM | $200
Beginning knifemakers will learn all phases of construction, grinding, and finishes. Beginners will be walked through the processes but this class is open to all skill levels.

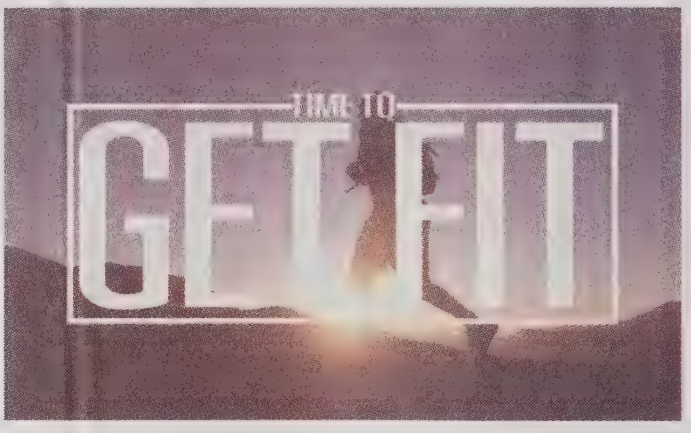
@ Wednesday Nights with Ed Vanhoy
3/7-5/30 | W | 5:30-9:30 PM | $200
This beginner's class will introduce blacksmithing and forging techniques as well as knife forging and tool making. Beginners will be walked through the processes but this class is open to all skill levels.

Do you see yourself in front of an easel or behind a camera?

@ Art Club with Joe Grebner
2/20-5/1 | T | 9:30 AM-2:30 PM | $135
Come meet old friends or make new ones in this class for all skill levels. Explore your artisitc potential and build confidence while building your skills. But most of all, nurture your creative side and have fun! Classes are held at the Troy Senior Center on Page Street. **Scholarships available!**

@ Digital Photography with Dan Wray: Beginner/ Intermediate
2/20-3/20 T | 6-8 PM | $90
So you have a camera but not the confidence to use it well? This course is for you. We'll cover the basic principles that apply to all digital cameras. When you understand the basics of how cameras work you can pick up any camera and make it serve your purposes. The class will cover apertures, shutter speeds, exposure and ASA, and move on to advanced subjects like composition, action and the principles of light and shadow. Explore basic photo accessories and post-processing programs. Students may bring their own camera. A limited number of cameras are availble for student use.

Do you see yourself stronger and more fit?



@ Kickboxing BEAST
1/18-3/30 | MTH | 6-7 PM | $40
Page Street Elementary Gym
Improve your endurance and cardiovascular fitness, tone your muscles, and shred your abs with consistent practice, power and precision. GetFit StayFit kickboxing routines are characterized by their high intensity intervals coupled with toning recovery periods to zap calories and define muscles.

@ Train Hard or Go Home Bootcamp
4/9-6/18 | MTH | 6-7:15 PM | $45
MCC Campus outdoors
GetFit StayFit Bootcamps are designed for maximum calorie burn in the shortest amount of time. Get fit, get healthy, challenge your mind, challenge your body, and most importantly, have fun!

Do you see yourself as a nature-lover?

Are you an avid hunter or outdoorsman? Save money by learning the art of taxidermy and gain the knowledge and hands-on training needed to mount your own hunting trophies! Montgomery Community College offers classes in mammals (big & small game), birds, and fish taxidermy. Classes focus on such topics as skinning and fleshing, airbrushing, hide repairing, scene construction, and the business side of taxidermy,

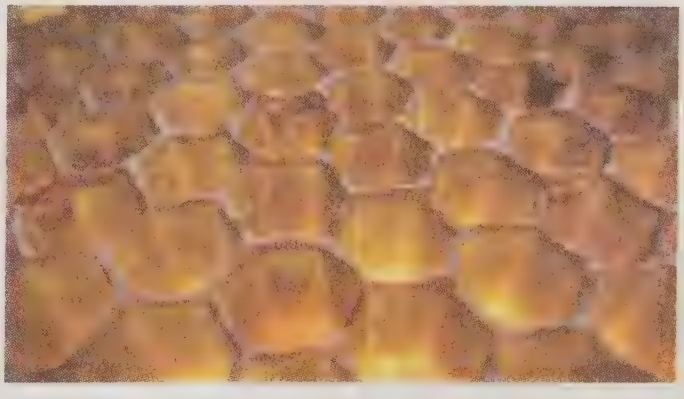
Begin your journey into the wild world of taxidermy! For class information visit our website at www.montgomery.edu/futurestudents/continuing-education, or call our lead instructor at 910-898-9733.

Taxidermy

@ Introduction to Mammal Taxidermy
1/8-2/20 | MTW | 9:30 AM-6 PM | $200

@ Deer Taxidermy
2/21-3/28 | MTW | 9:30 AM-6 PM | $200

@ Small Game Taxidermy
4/3-5/8 | MTW | 9:30 AM-6 PM | $200



Beekeeping

@ Beekeeping for Everyone with Shirley Harris
2/19-3/26 | M | 6-8 PM | $35
3/3, 3/17 | SA | 10 AM-12 PM - hive visits
Try this for a sweet hobby! From basic bee-ology to managing hives and treating pests, this course will have something for "newbies" and seasoned beekeepers alike.

Continuing Education Schedule

Continuing Education classes are added throughout the semester. For a complete listing of classes please visit our website at www.montgomery.edu/futurestudents/continuing-education.

NEW ASSOCIATE IN ENGINEERING DEGREE

The Associate in Engineering degree parallels the freshman and sophomore level coursework at four-year institutions within the

University of North Carolina System

and is ***fully transferable*** to any of these institutions toward a baccalaureate degree.

The Associate in Engineering degree is designed for students pursuing a four-year degree in one of the engineering disciplines. See our website for complete details at: www.montgomery.edu/engineering or call 910-898-9612 for more information.

NEW STUDENT INFORMATION

If you have never attended Montgomery Community College, you may follow these steps to help you get started on a degree, diploma or certificate:

1. Visit www.montgomery.edu/apply to complete the N.C. residency determination process and the online admission application.
2. Submit an official high school or equivalency (i.e., GED®) transcript and official transcripts from all colleges attended.
4. Take any required placement testing when notified by our enrollment office.
5. Apply for financial aid at www.montgomery.edu/financialaid.
6. Make an appointment with your academic advisor to schedule your classes and register.
7. To complete your registration, pay tuition and fees online via WebAdvisor or in person at MCC's Business Office. A payment plan option is available during specified dates. For payment plan information visit www.montgomery.edu/business-office. If you have applied for financial aid, you may check the status of your application through your WebAdvisor account.

REGISTRATION

ADVISING & REGISTRATION FOR NEW STUDENTS
PLEASE CALL 910-898-9600 FOR AN APPOINTMENT
Late registration: January 3, 2018: 9:00 AM - 12:00 PM & 4:00 PM - 7:00 PM
Submit your application now for spring term!

ACADEMIC CALENDAR

Spring Semester 2018

January 3	Late registration
January 8	Classes begin
January 15	Martin Luther King, Jr. holiday
January 18	Last day for partial tuition refund
March 5	Mid-term
March 6 - 11	Spring break
March 12	2nd 8-week session begins
March 12 - 23	Advising for summer term (current students)
March 26 - April 6	Summer registration by appointment (new students)
April 1	Financial aid priority deadline for summer term
April 2	Easter holiday
April 9	Last day to drop a course with a "W"
May 7	Term ends
May 9	Graduation

Medical Billing and Coding

Do you want to work in a medical office or other healthcare-related facility? The medical billing and coding certificate could open the door to a new career in filing medical insurance.

Develop skills in:

- Medical terminology
- Medical law and ethics
- Procedure and diagnostic coding
- Insurance coding & billing

Find out more at:
www.montgomery.edu/moa
or call 910.898.9612
or 910.898.9708.
